Additional features

Asset allocation⁸ Nonspousal continuation
Dollar cost averaging⁹ Nursing home waiver
Portfolio rebalancing

¹ An annual percentage of 0.35% will be added to your account value quarterly. It applies to deposits held in your contract for the specified time and all earnings. Annuities with reduced withdrawal charge periods generally have higher expenses; persistency credits help offset these expenses over time.

² This applies if you take out more than 10% of your total deposits or your account value, whichever is greater.

³ All features are subject to state and firm approvals. Please see your registered representative for details. Investment requirements apply. If you withdraw more than the allowable amount, your guaranteed values will be reduced or eliminated. You can elect to end these benefits after five years, or, with *i4LIFE*[®], before the Access Period ends.

⁴ Maximum charge of 2.25% single and 2.45% joint at account value lock in, or after 10th anniversary for enhancement.

⁵ Minimum issue age of 59½ for qualified; no minimum for nonqualified. The maximum charge for GIB is 2.25% single and 2.45% for joint at GIB reset.

⁶ Reduced for withdrawals.

⁷ Available for ages 80 and under.

⁸ Asset allocation does not assure or guarantee better performance and cannot eliminate the risk of investment loss.

⁹ Dollar cost averaging and portfolio rebalancing cannot be elected simultaneously. Neither assures a profit or protects against loss in declining markets. Because dollar cost averaging involves continuous investment regardless of changing price levels, clients should consider their ability to continue purchasing through periods of all price levels.

Variable annuities are long-term investment products designed for retirement purposes and are subject to market fluctuation, investment risk, and possible loss of principal. Variable annuities contain both investment and insurance components and have fees and charges, including mortality and expense, administrative, and advisory fees. Optional features are available for an additional charge. The annuity's value fluctuates with the market value of the underlying investment options, and all assets accumulate tax-deferred. Withdrawals of earnings are taxable as ordinary income and, if taken prior to age 59½, may be subject to an additional 10% federal tax. Withdrawals will reduce the death benefit and cash surrender value.

Investors are advised to consider the investment objectives, risks, and charges and expenses of the variable annuity and its underlying investment options carefully before investing. The applicable prospectuses for the variable annuity and its underlying investment options contain this and other important information. Please call 888-868-2583 for free prospectuses. Read them carefully before investing or sending money. Products and features are subject to state availability.
